Attachments: [Draft Gunshy sample locations.jpg](#)

Hi Brandon,

Attached is a quick map showing the approximate locations of each boring. With the funds remaining on the TO, I am unable to have the GPS points processed to create a sample location map in GIS. I need to keep the remaining funds available for when I receive the utility locating invoice from the locators, who are typically quick to send an invoice.

We have put together an cost estimate, which Dhroov will be sending to the CO this week.

Subject: Gunshy Sample Location Map

Hi Jeff

Wanted to touch base to see if you had a chance to develop a map with the sample locations.
